Experience

Software Development Intern | Bluestock

- Built responsive and reusable UI components using **React.js**.
- Integrated **RESTful APIs** with the frontend using **Node.js** and **Express.js**.
- Collaborated in an agile development team to implement new features and troubleshoot production issues.
- Optimized application performance and enhanced user experience through debugging and code improvements.

Projects

MERN E-Commerce Platform

Built a full-stack MERN e-commerce platform with JWT authentication, product catalog, cart management, and order APIs. Designed responsive UI using React.js and implemented RESTful backend services with Node.js and Express. Managed product and order data using MongoDB.

Inventory Management System

Developed a web-based inventory management application to track products, update stock levels, and manage inventory records. Implemented CRUD operations using backend APIs and integrated database storage for product management. Designed a responsive interface to add, edit, and monitor inventory items efficiently. Used Git for version control and hosted the project on GitHub.

Real-Time Multiplayer Chess Game

Developed an interactive chess game using the MERN stack, implementing real-time gameplay and standard chess rules including move validation and game state detection. Built scalable backend and dynamic frontend for smooth multiplayer/user interaction.
